FENDER SKIRTS 1934-1947- \$300.00 plus shipping-call for shipping cost.

The fender skirts are made by hand from new materials. They should not be confused with original factory skirts offered between 1934 and 1938 or with other aftermarket skirts. Skirts are shipped to you in bare metal with a light coat of WD-40 to minimize moisture damage in transit. A rubber welting is rolled permanently into the skirt edge to prevent damage to your cars finish. "Minor" shaping of the skirts may be required to make them fit up flush with your car fenders. Most fenders have received some damage over the years and have lost perfect factory contour. Hand bending or small hand tool use may be necessary. Normal steps for painting should be taken to prepare skirts for mounting on your car. Degrease, metal prep, prime, finish color, sand-buff-wax as necessary. K-gap skirts do not include the factory emblems as originally equipped on 1934-38 cars. See Accessories above for 36-37 Terraplane fender skirts emblems. There are 5 styles: 1. 1934-35, 2. 1936, 3. 1937-40 style (low radius wheel opening), 4. 1942-47 passenger cars, 5. Custom teardrop style-intended for some 1939 and 1940 cars with full radius wheel wells and 1941-47 pick-ups. They will also fit most 1936-41 models depending on your taste.
